SUMMARY

A seasoned Software Engineering Executive with over a decade of experience specializing in scalable software solutions and fostering high-performing teams. Dedicated to driving innovation while cultivating a balanced and supportive workplace that propels both team and organizational success.

PROFESSIONAL EXPERIENCE

Director of Engineering   May 2023 – Present
LifeSpot, Remote
- Fostering a culture of collaboration, continuous improvement, and excellence
- Oversee the entire software development lifecycle, including planning, architecture design, implementation, and deployment
- Implement agile methodologies to enhance efficiency, scalability, and product quality
- Work closely with product management, UX/UI design, and exec teams to deliver comprehensive safety solutions
- Drive the development and successful launch of platforms that enhance situational awareness and streamline communication for public safety officials
- Ensure user-centric design and rigorous testing processes, resulting in high user satisfaction and trust
- Lead talent acquisition and professional growth initiatives, mentoring engineers to advance their skills and leadership capabilities
- Establish and maintain partnerships that align engineering initiatives with business objectives and industry standards

Senior Mobile Engineering Consultant & Manager   May 2022 – May 2023
Muzio Mentoring, Remote
- Develop and execute strategies to migrate mobile apps to Flutter, ensuring seamless transitions and optimal performance
- Recruit, build, and lead Flutter development teams, fostering continuous learning and excellence
- Design and implement efficient development workflows and best practices for Flutter, improving productivity and code quality
- Cultivate a positive engineering culture emphasizing innovation, accountability, and continuous improvement aligned with goals
- Provide guidance on Flutter architecture, state management, and performance optimization for scalable applications
- Conduct workshops and training to upskill teams on Flutter, promoting knowledge sharing and proficiency
- Partner with product management, UX/UI design, and stakeholders to ensure Flutter solutions meet business needs
- Implement testing frameworks and QA processes to ensure app functionality, reliability, and user satisfaction

Founder & CEO   Apr 2016 – May 2023
Any Kinda App, Remote
- Define and execute the company's vision and strategy, driving growth and aligning with market demands and technological advancements
- Lead the development of cross-platform mobile applications using Flutter, ensuring high performance, scalability, and exceptional user experiences
- Oversee multiple projects and manage budgets, financial planning, and resource allocation to ensure on-time delivery and sustainable growth
- Recruit, mentor, and lead a diverse team of developers, designers, and project managers, fostering a collaborative and high-performance environment
- Implement and refine development workflows and best practices to enhance efficiency, reduce costs, and maintain rigorous testing protocols
- Collaborate with clients to understand their needs, define project requirements, and pursue new business opportunities to expand market presence
- Manage remote teams across regions, ensuring seamless communication and integrating the latest trends in mobile app development and Flutter
- Lead marketing initiatives and brand development efforts to enhance the company's visibility and reputation in the competitive mobile app market

Senior Software Engineer Team Lead   Dec 2021 – May 2022

Superformula, Remote
- Directed a diverse team of engineers, fostering collaboration and creating a dynamic, successful virtual environment
- Built and maintained strong client connections, managing inquiries, concerns, and escalations to meet contractual obligations and preserve relationships
- Successfully delivered a new UI Toolkit for a white-labeled Flutter app, meeting all deliverables efficiently and enhancing user experience
- Developed robust roadmaps and provided clear vision and direction to ensure long-term success and alignment with business goals
- Implemented process optimizations and cost reductions, achieving annual savings of 45% while maintaining project timelines
- Utilized Agile methodologies to establish and enforce timeline objectives, keeping projects on track and within scope
- Enhanced account strategies and defined business requirements through effective client interactions, consistently surpassing client expectations
- Technologies Used: Flutter, Dart, Swift, Kotlin, Git, Agile, Jira, Slack, Firebase, REST, Figma, VSCode, Xcode, Android Studio

Senior Software Engineer   Aug 2019 – Dec 2021

Superformula, Remote
- Led the complete rewrite of a large-scale mobile application in Flutter, meeting key deadlines and surpassing user expectations
- Partnered with UX designers to create and iterate intuitive user interfaces based on user feedback, enhancing overall user experience
- Developed innovative, highly scalable products using the latest technologies, ensuring robust performance and reliability
- Collaborated with cross-functional teams to manage short- and long-term release cycles within complex development systems
- Managed small- and large-scale projects independently, overseeing design, coding, testing, and deployment using CI/CD best practices
- Implemented CI/CD pipelines and automated testing frameworks to streamline development processes and improve deployment efficiency
- Ensured high levels of user satisfaction by delivering solutions that align with client needs and business goals
- Utilized technologies including Flutter, Dart, Swift, Kotlin, Git, Agile, Jira, Slack, Firebase, REST, Figma, VSCode, Xcode, Android Studio

Senior Software Engineer   Dec 2014 – Aug 2019

Workiva, Scottsdale, AZ
- Streamlined documentation and processes to enhance team productivity and efficiency
- Created automation tools for infrastructure provisioning, accelerating software delivery cycles
- Designed and deployed features using CI/CD practices, ensuring reliable and rapid deployments
- Collaborated with UX designers to implement intuitive, user-friendly interfaces, enhancing user experience
- Utilized technologies including Objective-C, Swift, Java, Git, Agile, Jira, REST, Sketch, Docker, Kubernetes

Software Engineer   Dec 2013 – Dec 2014

Workiva, Scottsdale, Arizona, United States
- Designed and implemented new features to enhance functionality and improve user satisfaction
- Ensured clean, maintainable code through rigorous reviews, unit testing, and adherence to best practices
- Worked closely with UX designers, product managers, and QA teams to translate requirements into efficient technical solutions
- Improved software performance by identifying and resolving bottlenecks, enhancing application responsiveness

Software Engineer in Test   Feb 2013 – Dec 2013

Any Kinda App, Scottsdale, AZ
- Conducted root cause analyses and implemented corrective measures to ensure software reliability and performance
- Tested and analyzed user interfaces for consistency and functionality, driving improvements and enhancing user experience
- Developed and tested automation tools for infrastructure provisioning and deploy new features using CI/CD best practices
- Collaborated with QA & Dev teams to quickly resolve errors, ensuring smooth software operations
